D. Conclusion	28

ANNEX A - Military Expenditures

ANNEX B - Department Of Defense Programs

ANNEX C - Africa Regional Elections Assistance Fund

A. Introduction

Sub-Saharan Africa is the area of the world most severely affected by conflict over the past decade. The World Bank has estimated that of the 70 million people worldwide displaced by conflict during this period, roughly half or 35 million have been in sub-Saharan Africa. In nine African countries over twenty percent of the population is displaced. In Liberia alone, two-thirds of the population is displaced. Conflict has devastated the economies of these countries; the Bank has estimated that the GDP of Uganda, for example, could have doubled its actual level had the civil war that devastated the country not occurred.

The 1995 Interagency Plan for the African Conflict Resolution Act provides some insight into characteristics of and possible solutions to conflict in Africa, that are applicable elsewhere:

--Issues that arise in the early stages of conflict often deepen and become more intractable as disputes escalate.

--It is critical for interventions to occur in these early stages before a conflict gathers momentum and becomes more difficult and expensive to resolve.

--Ethnic and religious divisions are among the more important bases for conflict that local leaders often choose to exploit. Negotiation of lasting solutions requires significant knowledge of the local culture and involvement of indigenous institutions.

--Conflicts within individual states frequently have regional impacts that threaten the security of neighboring countries. Localized African conflicts often are best resolved through diplomatic and military interventions by other African states.

--To sustain resolutions to conflict it is often necessary to provide adequate inducements for conflict-prone countries to downsize their militaries and to increase investments in education, health and other domestic programs.

The United States has been in the forefront of efforts to help African nations prevent, mitigate, resolve, or recover from armed conflict. Thus, many African countries have benefitted from US assistance for resolution of civil conflict. US aid for crisis prevention and resolution is provided bilaterally and through regional institutions and takes many forms including, but not limited to, diplomatic intervention, disaster assistance, peacekeeping operations, conflict mediation, programs countering hate radio, demobilization of armed combatants, elections support, and long-term development assistance.

There have been some notable successes. The United States has played a significant role in supporting peace processes during the past year in Angola, Sao Tome and Principe, and Sierra Leone, and in helping to prevent hostilities between Cameroon and Nigeria. Even where our efforts have not been fully successful in helping to maintain peace, as in Burundi and Liberia, the United States has worked very hard to mitigate violence, protect US citizens and others, provide humanitarian assistance, and reconcile opposing factions. US-supported elections in such countries as Sierra Leone, South Africa, and Tanzania have helped not only to strengthen democracy - or to augur its return - but also to defuse conflict in polarized or potentially-polarized societies. US assistance also has helped formerly war-torn countries such as Ethiopia, Uganda and Mozambique to recover from conflict. Mozambique's national income growth was an estimated twenty-two percent in 1995. US advice helped to foster reductions in arms spending and increases in social spending in formerly conflictive countries. Military expenditures per capita and as a percentage of GNP decreased dramatically in sub-Saharan Africa from 1992 to 1994. Also in the case of Mozambique, decreases in security-related expenditures could reach 45 percent from wartime highs and there have been significant increases in education and health spending.

Despite such successes (often far removed from the headlines), complex emergencies in sub-Saharan Africa and elsewhere continue to tax the will and resources of international donors. Funding is declining for various types of assistance, and particularly for long-term development aid important for preventing crises and conflict. Fiscal Year 1996 funding for US bilateral development assistance and US contributions to multilateral institutions have been greatly reduced from prior year levels. These reductions are being made despite the evidence that dealing with the underlying causes of economic and political instability is critical for mitigating requirements for more expensive responses needed after the onset of complex emergencies.

The benefits of assistance for crisis prevention and resolution go beyond the monetary value of aid delivered, although benefits and results are very difficult to measure (see section C. below). Most Americans can appreciate the tangible benefits of US humanitarian assistance to people in desperate straits, as well as the intrinsic, humanitarian benefits to this country. However, the direct benefits to the United States of development and other assistance for preventing or responding to conflict and complex emergencies are not often clear at the outset. Only when the effects of environmental degradation, severe political and economic instability, mass refugee movements, and/or disease epidemics spread across international borders do the threats to our well-being from crisis and conflict become more apparent.

This is the second annual report on activities related to the Interagency Plan developed in accordance with the African Conflict Resolution Act (PL 103-381). While the Act did not provide new funding for conflict prevention and resolution, much is being accomplished. The Interagency Plan, and this progress report, present a composite picture of how agencies of the U.S. foreign affairs community are working together, as well as individually, to achieve U.S. foreign policy goals for protecting US interests and improving the lives of Africans afflicted or threatened by crisis and conflict. The efforts of the employees of these agencies, and those of their partners from international and non-governmental organizations (NGOs), are all the more remarkable because they are being undertaken in the absence of sufficient financial resources to meet the vast array of challenges adversely affecting sub-Saharan Africa and, ultimately, the interests of the United States.

The dearth of funding has not shaken their commitment to get the job done.

B. Progress Report for FY 95/96

This report is structured according to the five major elements of the legislation:

1. Improving the Conflict Resolution Capabilities of the Organization of African Unity (OAU)
2. Improving the Conflict Resolution Capability of Sub-Regional Organizations
3. Improving Conflict Resolution Capabilities of Non-Governmental Organizations (NGOs)
4. Supporting African Demobilization and Retraining Efforts
5. Training for Africans in Conflict Resolution and Peacekeeping

The report also discusses support for preventing, mitigating, or resolving conflict that is not captured in the specific provisions of the legislation.

1. Conflict Resolution Capabilities of the Organization of African Unity (OAU)

The Act authorizes the President to provide assistance to strengthen the conflict resolution capability of the Organization of African Unity (OAU).

The Department of State ("State") continues to work closely with the OAU on conflict resolution and peacekeeping; the OAU has increased and improved its efforts to resolve African conflicts, sponsoring mediation and other interventions by, and with, heads-of-state. The OAU also has increased its observer activities.

In addition to the \$4.5 million contributed in previous years, State contributed \$650,000 in FY 1995 voluntary peacekeeping operations funding to assist the OAU to enhance its conflict management capacity. This assistance has included training and equipping a 100-man observer force for rapid deployment anywhere on the African continent to monitor, react to, and resolve conflicts. Also in FY 95, the USIA provided \$3,000 in funding for a study tour for the Director of the OAU's Unit for Conflict Prevention, Management and Resolution.

A recent example of the OAU's improved capabilities was its brokering of an agreement between factions in the Comoros to allow the country's president to return and assume the ceremonial duties of his position pending elections. The first round of elections was successfully held on March 6, 1996. The State Department sponsored two observers to monitor these elections.

In FY 1996, State has budgeted \$3 million for conflict resolution assistance for the OAU, the major portion of which will be used

to purchase additional equipment and train the observer force to support proposed conflict prevention and mediation in the Great Lakes Area, and also to provide support to the Intergovernmental Authority on Development (IGAD), that recently specifically included conflict prevention and resolution in its mandate (see discussion of IGAD on pg. 6).

2. Conflict Resolution Capability of Sub-Regional Organizations

The legislation also authorizes the President to provide assistance to strengthen the conflict resolution capabilities of subregional organizations in sub-Saharan Africa.

In FY 1995, the **Arms Control and Disarmament Agency (ACDA)** led U.S. efforts in monitoring and influencing the development of an African Nuclear Weapons Zone Treaty. On April 11, 1996 the treaty was opened for signature.

In addition, ACDA offered arms control assistance to the OAU and Southern African Development Community, that included a US Presidential initiative with Zimbabwe. ACDA also developed a comprehensive strategy for regional arms control in Africa, including an initiative to encourage regional arms control efforts. The proliferation of small arms in Africa fuels internal conflicts, threatening regional stability, fledgling democracies and fragile economies. In South Africa, for example, between March and July 1995 police seized almost 71,000 illegal weapons. However, many African countries lack the means to control arms within their countries or from crossing porous borders. ACDA also is continuing to compile and publish country data on military expenditures, armed forces, arms imports and exports, and other indicators to foster transparency in the region (see Annex A).

Regional Arms Control Small Arms Disarmament/Destruction

The State Department identified a requirement in 1995 for a model for the destruction of conventional weapons during the process of military demobilization in sub-Saharan Africa, primarily as a result of the experience with demobilization in Mozambique. ACDA responded by developing a model **Protocol for Destruction of Conventional Weapons (Small Arms)**, a practical measure to support demobilization/disarmament on the African Continent. Small arms play a central role in African conflicts. Systematic attempts are necessary to disarm former combatants after a political settlement ending a conflict is reached, among other reasons, to mitigate prospects for resumption of hostilities. A model protocol for the destruction of conventional weapons as part of a military demobilization and disarmament strategy is a first step in facilitating the timely, verifiable destruction of arms for preventing such weapons from becoming a regional destabilizing influence.

In FY 1996, ACDA is initiating:

- Arms control and nonproliferation consultations with key sub-Saharan African countries.
- A small arms control effort against illegal trafficking in arms, including a protocol on destruction of such arms.
- Completion of the US review of the Treaty of Pelindaba Protocols for a nuclear weapons free zone in Africa, regarding US adherence to the Treaty.
- Consultations with South Africa on creation of the African Commission for Nuclear Energy.

Greater Horn of Africa Initiative (GHAI)

The leaders of the nations in the Horn of Africa are revitalizing the Intergovernmental Authority on Development (IGAD) -- formerly known as the Intergovernmental Authority on Drought and Development (IGADD) -- in concert with the Greater Horn of Africa Initiative (GHAI). IGAD recently formally included conflict prevention and resolution in its charter. A USG task force for the GHAI has supported IGAD's restructuring and has provided \$295,000 for communications improvements. Additionally, in FY 96 the USG has initiated a training program in conflict prevention and resolution for US personnel, NGOs and Africans.

Finally, USAID's Famine Early Warning System (FEWS) continues to report on effects of conflict on food security in the region, for example, regarding conditions in southern Sudan.

Sahel Region

In FY 1995, a USAID grant to the Permanent Interstate Committee to Control the Drought in the Sahel (CILSS) included \$100,000 for

Greater Horn of Africa Initiative

The Presidential Greater Horn of Africa Initiative (GHAI) aims to develop long term food security in the Greater Horn of Africa (Sudan, Somalia, Ethiopia, Djibouti, Eritrea, Uganda, Kenya, Tanzania, Rwanda and Burundi), as well as to foster conflict prevention and mitigation, to help diminish the vicious cycle of drought, famine, and death in the region. The GHAI recognized that there can be no food security or economic development in the absence of peace. The USAID-led GHAI task force has established a US government interagency team, RADARS, to focus on conflict prevention and mitigation in the Greater Horn. In 1996 under the GHAI, US government agencies are working collaboratively to develop five year country strategies for USAID programs in Kenya, Somalia, Tanzania, Eritrea, Uganda, and for Burundi and Rwanda. Efforts are being made to ensure that these strategies reflect a conflict prevention and mitigation perspective, and that such efforts are African-led and coordinated with other donors.

conflict resolution. These funds were used to prepare case studies that identified local mechanisms for conflicts over resource use, particularly by traditionally disadvantaged groups, such as women and animal herders. The funds also supported dissemination of findings of the case studies in a regional workshop attended by representatives of CILSS member countries.

In FY 1996, USAID will continue its support (\$40,000) to CILSS conflict resolution efforts. Local conflict resolution efforts will be strengthened by the staging of two workshops for management of conflict regarding 1) control of resources in pastoral zones and 2) gender inequities in resource control.

West Africa Region

In FY 96, USAID provided \$43,000 to CAP Africa, a private consulting firm in Senegal, to fund an international conference that brought together African researchers, university professors, jurists, and political leaders to discuss issues surrounding conflict in West Africa and attempt to define mechanisms for preventing conflict and supporting democratization in the region. The conference led to the creation of a non-governmental observation unit to track conflict and democratization in West Africa.

Liberia

The US Special Envoy for Liberia has worked with the Chairman of the Economic Community of West African States (ECOWAS) to achieve a negotiated settlement to the ongoing conflict, and to halt arms and munitions flows. At an October 1995 Donors Conference on Liberia the USG pledged \$75 million, including \$10 million in Voluntary Peacekeeping funds for logistics support to ECOMOG peacekeeping forces, to help implement the Abuja Peace Accord.

The renewal of hostilities in April, 1996 is necessitating the reassessment of requirements for peacekeeping operations and other assistance for Liberia.

3. Conflict Resolution Capability of Non-Governmental Organizations

The legislation authorizes the President to provide assistance to non-governmental organizations (NGOs) that are engaged in mediation and reconciliation efforts in sub-Saharan Africa.

Africa-wide

In FY 95, USIA committed \$90,000 for the multi-regional International Visitor program on Conflict Resolution for NGO participants from Ethiopia, Kenya, Lesotho, Sierra Leone, South Africa, Swaziland, Tanzania, and Zambia. (See 5. Training)

beginning on page 17 for a more complete listing of USIA training programs with governmental and non-governmental organizations.)

Great Lakes Region (Burundi/Rwanda)

In FY 95, with almost \$900,000 in USAID funding, the NGO Search for Common Ground established a radio production facility, Studio Ijambo, in Burundi staffed by both Hutu and Tutsi journalists that aims to reduce ethnic violence and counter hate radio by stressing themes of peace and reconciliation in its programming.

Also in FY 95, USAID granted \$80,000 to International Alert to support local NGO conflict prevention efforts.

In FY 96, USAID also plans to fund a Voice of America (VOA) broadcast initiative for Rwanda and Burundi to help counter hate radio. In addition, USAID plans to provide funding to train Rwandan and Burundian reporters in responsible journalism. Estimated total funding for these activities is \$1 million.

In FY 96, USAID granted the Carter Center \$200,000 for conflict resolution activities. The Center has organized two summits, in Cairo and Tunis, where key political leaders of the Great Lakes Region negotiated strategies for resolving intra-regional civic violence and other problems such as the destabilizing effects of mass refugee movements.

Ethiopia

In FY 95, USAID contributed \$500,000 from the Displaced Children/Orphans fund to indigenous NGOs helping orphans and streetchildren affected by war.

In FY 96, USAID continues to support the development of indigenous civic NGOs in Ethiopia by providing:

- Approximately \$89,000 for the Inter-Africa Group to observe and report on the war crimes trials;
- \$200,000 for workshops to strengthen human rights NGO capacity for reporting and advocacy; and
- \$165,000 for strengthening the capacity of womens' organizations.

Eritrea

In FY 96, USAID plans to provide a minimum of \$200,000 for US and indigenous NGOs to carry out activities such as reuniting unaccompanied children with families from whom they had been separated by conflict, and by increasing family incomes through small enterprise development.

Gabon

In 1995, USIA funded the participation of the Gabonese President of the Civil Rights Organization in the Voluntary Visitor program. (\$8,000)

Greater Horn of Africa Initiative (GHAI)

The GHAI contributed some \$70,000 in FY 95 State/AID Democracy and Human Rights (116E) funds to support conflict prevention and mitigation projects by non-governmental organizations in Burundi, Eritrea, Ethiopia and Tanzania. For example, the Region V Community Development Association in Ethiopia was assisted in organizing meetings of 190 community elders, spiritual leaders, government officials and members of opposition political parties to air their grievances and discuss dispute resolution methods.

Kenya

In 1995, USAID provided grants for conflict resolution-related activities to a number of NGOs, including Education Center for Democracy (\$24,000) workshops on civil and political rights for women members of parliament and local representatives. Also funded was establishment of a rural office and civic education and rights workshops through the League of Kenyan Women Voters (\$24,000). Finally, through the Kenya Human Rights Commission and Citizens Coalition for Constitutional Change (\$150,000), a model constitution for Kenya is being rewritten and constitutional reform encouraged.

Rwanda

USAID plans to provide \$750,000 from the Displaced Children and Orphans fund in 1996 for NGO activities for tracing and reunifying unaccompanied children with their families and for providing income generating assistance to those families.

Somalia

In FY 95, USAID/Somalia provided \$3 million for supporting local NGO activities for community development, i.e., primary health care, agriculture, water system rehabilitation, and employment/income generation, and by providing technical assistance and training for local governments. In FY 96, USAID is providing \$1 million to support these efforts.

South Africa

In 1995, USAID funded (\$79,000) activities managed by USIA on "The Media and Conflict Resolution" through the Community Outreach Leadership Development program.

USIA also funded workshops in 1995 for conflict resolution (\$9,700) and community policing (\$6,000).

4. African Demobilization and Reintegration

The Act authorizes the President to facilitate reductions in the armed forces of sub-Saharan African countries by providing assistance for demobilization of former combatants and reintegration into civil society of these combatants, their dependents, and other civilians affected by conflict.

Angola

In FY 95, USAID provided \$5.35 million for demining activities and is planning to provide a minimum of \$2 million in FY 96. Further, \$1.6 million was provided in FY 95 for demobilization and reintegration of combatants and \$307,846 for civic education in military quartering areas. Also in FY 95, USAID provided \$465,000 from the War Victims Fund to the International Committee of the Red Cross (ICRC) to support ICRC's efforts to meet the component needs of all prosthetics workshops operating in the country. An additional \$2 million will be provided in FY 96 to a US PVO to establish a workshop in a remote and currently unserved province where there are estimated to be no fewer than 3,000 unattended amputee victims of landmines.

USAID also increased funding to \$2 million in FY 95 (\$1 million more than original estimates) for NGO programs assisting unaccompanied children affected by the war. USAID plans to provide another \$2 million in FY 96.

Also in FY 96, \$700,000 is being provided for promotion of human rights through Voice of America programs. Up to an additional \$1 million will be provided in FY 96 to continue this assistance and for democracy and governance activities, including negotiation and conflict resolution training.

Burundi

USAID provided a \$490,000 grant in FY 95 to Action Contre la Faim (AIC/F) to provide housing materials to those who lost their homes during violent upheaval, an innovative and tangible measure for conflict resolution.

Ethiopia

In FY 95, USAID committed approximately \$2 million to support resettlement and reintegration programs providing ex-soldiers specific skills training, financial assistance, and basic supplies. USAID also funded skills training for the severely disabled.

Where the World Bank has Helped

The World Bank has played a critical role in demobilization and reconstruction of war-torn economies in Africa. Below are examples of the Bank's contributions to solving severe problems stemming from civil strife and conflict - contributions that frequently support US interests:

Angola

A World Bank initiative targets ex-combatants and displaced persons for quick-impact training and involvement in income-generating activities. This program is being implemented in a very difficult environment, one where millions of land mines are prevalent, for example.

Eritrea

An estimated one-quarter of Eritrea's 3 million people are refugees or internally-displaced, making the return and re-adaptation of displaced Eritreans a necessity for rebuilding the country after three decades of war. In collaboration with UNHCR, the World Bank is preparing a program to assist Eritrea with repatriating and reintegrating the estimated 500,000 Eritrean refugees returning from Sudan. A pilot phase for the program has been completed, resulting in the reintegration of around 25,000 refugees - some 85,000 have returned spontaneously.

Rwanda

The Consultative Group on International Agricultural Research (CGIAR), an association of 43 public and private sector donors co-sponsored by USAID, the World Bank and other international organizations, in 1995 established Seeds of Hope, a program gathering seeds for Rwanda's farmers to restore some of the country's agricultural self-sufficiency. Before the civil war, 91 percent of the economically active population of Rwanda was engaged in agriculture, but the war led to losses of up to 60 percent for some crops. CGIAR gathered and replicated seeds for varieties of Rwanda's main crops that matched what Rwandan farmers have long grown. In 1996, the World Bank also is reassessing requirements for a program for demobilization, reconciliation and reintegration in Rwanda.

Uganda, Namibia, Mozambique, and Ethiopia

The World Bank has played an important role in initiating and supporting multi-donor investments in demobilization in these countries. These programs have substantially decreased defense expenditures, permitting funds to be committed for reconstruction. Reintegration assistance has helped to mitigate transition tensions and facilitate a return to normalcy by providing options for the future for thousands of military-trained young men and even larger numbers of dependents. Bank supported programs affect approximately 40,000 demobilized soldiers in Uganda, 100,000 in Mozambique, and over 500,000 in Ethiopia. Demobilization aid consists of cash and in-kind payments along with counselling and information, vocational training, and agricultural land and credit schemes.

Eritrea

In FY 95, Eritrea continued its efforts to demobilize most of the 100,000 fighters in the guerrilla forces of the Eritrean People's Liberation Front (EPLF). State provided \$750,000 in peacekeeping funds to assist demobilization, to help reintegrate these demobilized soldiers into the economy, and to train them to participate in conflict prevention actions in Eritrea.

Liberia

Prior to the outbreak of renewed hostilities in April 1996, an interagency task force was assessing Liberia's needs, including job creation for excombatants, returning refugees, and the internally displaced. Community-based assistance to those affected by the war was to have been provided through 12 area reintegration and development centers, eight funded by USAID and four by European donors. Programs were planned for over 120 villages. The task force will reassess what type of assistance is feasible when the security situation stabilizes.

Also when the security situation permits, USAID is planning in FY 96 to provide between \$500,000 and \$1 million from the Displaced Children and Orphans Fund for Liberian children orphaned or displaced by the war.

Mali

In FY 95, USAID provided \$1 million to the UNDP-led multidonor trust fund for demobilization and reintegration of 7,500 combatants in the north of Mali. Other donor funding enabled 1,500 additional combatants to be demobilized. USAID's contribution will be used for such activities as civic education, vocational training, livestock replenishment, housing, small enterprise, employment assistance, and communications.

Mozambique

In FY 95, USAID provided \$5 million to fund information and employment referral services, skills training, counseling and other activities for ex-soldiers and their families.

In FY 95, USAID also programmed \$1.9 million from the War Victims Fund for improving the capacity of NGOs to provide rehabilitative services for civilian victims of war through provision of high-quality prosthetic and orthotic devices; outreach for affected people in rural areas; provision of accommodations and training for patients awaiting prosthetic devices; and beginning efforts to develop a local NGO or private-sector entity to take over provision of prosthetics services.

USAID plans to provide an additional \$600,000 for these

activities in FY 96 and also is planning to fund (\$200,000) an impact study on progress of reintegration efforts.

Finally, in FY 96 the Department of Defense is providing Excess Defense Articles (two trucks and assorted field equipment) to assist in demobilization and conflict resolution.

Niger

In FY 95, USAID provided an additional \$100,000 for a CARE project in former conflictive areas that is assisting rural dwellers to reintegrate into the local economy. USAID also granted an additional \$150,000 for an Africare natural resources management activity helping to demobilize, retrain, and reintegrate former Tuareg combatants into the economy. USAID also has been supporting a number of other activities in former conflictive areas in the north, including women's legal clinics (\$60,000), democracy and civics school curricula (\$70,000), and civics organizing and outreach (\$560,000).

Rwanda

In FY 95, State and USAID encouraged efforts by the Rwandan Army to downsize through partial demobilization, and to reintegrate troops from the former army (ex-FAR), based on a preliminary assessment by the World Bank. Prospects for demobilization are being reassessed in FY 96. In FY 95, USAID and DOD also began a \$2.2 million demining program for building local institutional capacity to help demine the country, thereby aiding reintegration efforts and enhancing security for civilian communities.

Sierra Leone

In FY 95, USAID approved a \$900,000 project for NGOs, including Opportunities Industrialization Center International (OICI), to carry out trauma counselling for women and children and family tracing; psychosocial rehabilitation; training and reintegration of former child and adult combatants; job training for widows of soldiers; counselling and training of displaced youths; and training for teachers, trainers, social workers, and local community leaders. The project will continue in FY 96. USAID plans to provide an additional \$450,000 in FY 96 for some of these activities from the Displaced Children and Orphans Fund.

Uganda

In FY 95, USAID provided \$3.65 million in support of Uganda's highly successful demobilization program. Uganda has served as a model for other countries seeking to downsize their armed forces after years of civil war. Uganda has reduced the size of its armed forces from 90,000 to 40,000 troops.

Zaire

In FY 95 USAID (OFDA) provided a \$1.5 million grant to World Vision Relief and Development for nutrition and agriculture assistance to displaced Kasaians fleeing ethnic violence in the Shaba province. Also in FY 95, \$1.1 million was provided to Doctors Without Borders (Belgium) for medical and water sanitation support to displaced persons in Shaba province.

5. Training Africans in Conflict Resolution and Peacekeeping

The Act authorizes the President to establish programs to provide education and training in conflict resolution and peacekeeping for civilian and military personnel of sub-Saharan African countries. Funds made available through the International Military Education and Training (IMET) program may be used for this purpose.

Africa-wide Training

Department of Defense (DOD)

DOD, in collaboration with State, supported a number of efforts to train Africans in conflict resolution and peacekeeping. Separate efforts supported by DOD included a 1995 regional conference in Benin, on "The Role of a Military in a Democracy"; "Peacekeeping, Disaster Relief and Democracy" in Cameroon; and "Maintaining Order in a Democracy with Respect for Human Rights" for magistrates, senior military and police officials in the Central African Republic. Additionally, the US Naval Justice School provided "Military Justice and Human Rights" training to eight African countries in FY 95 (Chad, Central African Republic, Ghana, Niger, Rwanda, Senegal, South Africa, and Zimbabwe). The US Air War College conducted "Civil-Military Relations in Democratic Societies training in six African countries (Benin, Mauritania, Mozambique, Sierra Leone, South Africa, and Zimbabwe). Also, the Center for Civil-Military Relations conducted a week-long seminar in Malawi in June, 1995 (another one was completed in March, 1996 in Ghana) for senior military, parliamentary, and NGO leaders that focused on civilian control over the military, professionalization of the military, and differentiation between military and police roles.

Additionally, in FY 96 DOD is developing a course specifically devoted to conflict resolution for both US and foreign military and civilian students through funding provided by the International Military Education and Training (IMET) program. (See Annex B for a listing of DOD activities and services provided to African countries, including transfers of non-lethal Excess Defense Articles to foreign militaries under the authority of the Foreign Assistance Act and Excess Property provided to

non-military organizations under Title 10, DOD authorities.)

U.S. Information Agency (USIA)

The U.S. Information Agency targets its training and related activities (workshops, personal and electronic information programs, academic and professional exchanges, and special grant programs) for conflict resolution to increase individual and institutional capacity of African governmental and non-governmental political, academic, media and civil institutions.

USIA's Africa-wide programs are summarized as follows:

- International Visitor program on Conflict Resolution for participants from Guinea-Bissau, Congo, Tanzania, Zimbabwe, South Africa, Uganda, Rwanda, Zaire, Nigeria, Gabon, Togo, Lesotho, Liberia, South Africa, and Cameroon. (\$160,000)
- International Visitor program on "Rule of Law and Administration of Justice" for participants from Gabon and Nigeria. (\$22,000)
- International Visitor program on "Promoting Human Rights and Rule of Law" for participants from Gabon and Nigeria. (\$22,000)
- Multi-regional International Visitor program including participants from on "Building Democracies in Diverse Communities" including participants from Sierra Leone, Nigeria, Kenya, Mozambique, Ivory Coast, and Cape Verde. (\$66,000)
- Humphrey International Conference on Global Peace: Conflict Resolution for participants from thirty-eight African posts. (\$45,000)
- Citizen Exchange program on Conflict Resolution for conflict management educators and practitioners from Ghana, Nigeria, Kenya, Ethiopia, and South Africa. This program is administered by Iowa State University. (\$125,000)
- Citizen Exchange program on "Human Rights and Ethnic Reconciliation in East Africa" organized with Freedom House for participants from Eritrea, Tanzania, and Uganda. (\$120,000)
- Citizen Exchange program on "Africa Judicial Exchange" organized with American Bar Association for participants from Malawi, Tanzania, Uganda, and Zambia. (\$250,000)
- Citizen Exchange program on "Africa Sister Law School Project" organized with American Bar Association with participants from Eritrea, Ethiopia, Ghana, Kenya, Malawi, Tanzania, Uganda, and Zambia. (\$200,000)
- Citizens Exchange program on "Africa Public Defenders and Legal

Aid" administered by the University of Vermont for participants from Ethiopia, Tanzania, Uganda, and Zambia. South Africa/Zimbabwe. (\$195,000)

-International peacekeeping conference by USAF School of Advanced Airpower Studies in Zimbabwe and South Africa. (\$3,800)

USIA also staged more than twenty Worldnet interactive broadcasts on conflict resolution in 1995. (\$170,000)

Bilateral Training

Country-specific training and related activities sponsored by DOD, USIA, USAID, and other agencies include the following:

Angola

In FY 96, DOD is pursuing an expansion of IMET to Angola, reaching out to the military and former warring factions to provide instruction in respect for human rights, the role of the military in a democracy, and related areas. (\$125,000)

USIA and the Voice of America organized a two-week training program in Luanda for sixty-five Angolan print and electronic media journalists and managers. This program was funded through a USAID grant and emphasized the role of the media in conflict prevention and resolution. (\$60,000)

Burundi

In FY 95, USAID provided a \$30,000 grant to UNICEF to promote education and democracy training in Burundian primary and secondary schools for students, teachers, and other adults and youths not enrolled in school.

In FY 95, USAID also granted Africare \$3.5 million to train local NGOs in conflict resolution and reconciliation.

Also in FY 95, USAID provided \$150,000 to UNHCR to support the reconciliation program of the Center for Human Rights.

In FY 95, USIA sponsored a workshop in Bujumbura on "Justice and Journalism" for print and broadcast journalists from Burundi and Rwanda with assistance from USAID and Search for Common Ground. (\$15,000)

Liberia/Sierra Leone

USIA sponsored conflict resolution workshops with NGOs and political leaders in Liberia and Sierra Leone in 1996. (\$7,300)

Mozambique

In FY 95 State and USIA sponsored a seminar on "The Role of the Military in a Democracy" for a group of visiting Mozambican officers. (\$80,000)

Sierra Leone

State conducted a workshop on improving civilian/military dialogue in December 1995. A follow-up workshop is planned for 1996 on the role of the military in a democracy.

South Africa

In FY 94/95, USAID granted \$215,000 to the Vuleka Trust to train communities in the violence-plagued Kwazulu Natal in basic human relations, conflict management, negotiations, and mediation; and another \$70,000 to mediate discussions between the government and traditional chiefs.

USIA sponsored a range of activities in South Africa, including:

- International Visitor program on "Conflict Resolution" for journalists from South Africa. (\$79,000)
- Citizen Exchange program on "State Legislatures/Federalism and Inter-governmental Relations" for participants from South Africa. (\$150,000)
- Citizen Exchange program on "U.S-South African Police Conflict Resolution Exchange" administered by Search for Common Ground for participants from South Africa. (\$120,000)
- Citizen Exchange program on "Linking Community and School-Based Mediation in South Africa" administered by Temple University for participants from South Africa. (\$110,000)
- Citizen Exchange program on "Building Democratic Institutions in South Africa" administered by John Hopkins University for participants from South Africa. (\$100,000)
- Citizen Exchange program on "Local Self-Government Project: Strengthening Democratic Institutions" administered by John Hopkins University for participants from South Africa. (\$140,000)
- Workshops on traditional forms of mediation by the U.S. Navajo Nation Supreme Court Solicitor conducted for traditional leaders and politicians in KwaZulu/Natal Province. (\$11,800)

Tanzania

USIA sponsored a conflict resolution workshop by the Institute for Multi-Track Diplomacy for government and religious leaders on conflict resolution in Dar es Salaam. (\$18,000)

Zaire

USIA sponsored a conflict resolution and negotiation teleconference in 1995 with Harvard University's Management Group and political leaders in Zaire. (\$200)

Greater Horn of Africa Initiative (GHAI)

A manual for the prevention and mitigation of violent conflicts is being developed for use in the GHAI. This manual identifies root causes of conflicts in the Horn, describes region-wide and country-specific conflicts in the region, and prescribes conflict prevention and mitigation techniques.

As mentioned earlier in this report, training also is being developed in conflict prevention and mitigation for USG staff at posts in the Greater Horn, and will eventually be extended to NGOs and Africans. This training will include instruction in basic conflict prevention principles and case studies on lessons learned from conflicts such as those in Rwanda and Somalia.

6. Other Support for Preventing, Mitigating, and Resolving Conflict in Africa

An informal interagency working group chaired by the Department of State's Africa Bureau convenes regularly to assess the progress of US Government efforts to promote conflict resolution in Africa, to sensitize participating departments and agencies to the benefits that can be derived from effective conflict prevention, and to lay the foundation for a formal national policy. Other participating agencies include USAID, DOD, the Department of Justice, USIA, ACDA, the Central Intelligence Agency, and the Defense Intelligence Agency.

Activities that do not correspond specifically with provisions of the African Conflict Resolution Act but that are still relevant to the discussion of US policy include:

Angola

The United States is a member of the Joint Commission charged with overseeing the implementation of the Lusaka Protocol and the US delegation played a major role in the conclusion of the Protocol, a comprehensive peace agreement that provides a framework to end the Angolan civil war.

BURUNDI AND RWANDA: PREVENTIVE DIPLOMACY

The President has appointed a Special Envoy, former Representative Howard Wolpe, to lead U.S. efforts to foster peace and reconciliation in Burundi. The Special Envoy works closely with the State Department Special Coordinator for Rwanda and Burundi. Both have made frequent trips to the Great Lakes region, engaging in a variety of preventive diplomacy activities. Furthermore, a series of high-ranking USG officials, including UN Ambassador Albright, National Security Advisor Lake, Deputy Secretary Talbott, USAID Administrator Atwood, Assistant Secretary of State Moose, and Assistant Secretary Shattuck visited Burundi over the past year to emphasize the need for national reconciliation and to underline our support for the Convention of Government. Even though US efforts to achieve a lasting peace in Burundi have not yet been fruitful, they have helped to galvanize other African nations and the OAU to take a more aggressive stance against violence in that troubled country.

The USG also provided active support for the UN's International Commission of Inquiry on Rwanda and insured regular statements and appeals by senior officials. The State Department and USAID have provided diplomatic and financial support to the activities of the Human Rights Field Organization in Rwanda that has about 100 monitors on the ground. State also organized the Rwanda Operational Support Group, comprised of over two dozen donor countries and multilateral organizations, that meets regularly to coordinate activities and promote peace and stability in the region.

Burundi

USAID provided about \$145,500 to the Buyoya Foundation between 1994 and 1996 for democracy/governance activities, in an attempt to bolster the moderate center's efforts to resolve conflicts.

USAID is providing \$300,000 for UN human rights monitors in FY 96 to reduce the potential for conflict and human rights abuses.

Chad

In 1995, the US Embassy in Libreville supported the Chadian National Reconciliation Conference in Franceville, Gabon, in which the Ambassador directly participated.

Ghana

In FY 95, State and DOD provided \$2.9 million, including \$780,000 in ESF, to support costs for a Ghanaian peacekeeping battalion in Liberia, and for expenses of other conflict resolution activities. It is noteworthy that the Ghanaians contributed approximately \$2 million for their own peacekeeping expenses.

In FY 96, DOD has provided twenty military vehicles to the Ghana Armed Forces under the Excess Defense Articles program to be used for peacekeeping efforts.

Mozambique

In 1995 and 1996, the US Embassy and USAID Mission have been engaging in policy discussions with the government for reduction in military and security-related expenditures. These efforts have borne fruit; projections for decreases in security-related expenditures range from 30 and 45 percent. There has been a corresponding increase in spending on health and education.

Nigeria/Cameroon

The US embassies intervened with the Governments of Cameroon and Nigeria in 1995 counselling them to refrain from military action in their dispute over the Bakassi peninsula, and to seek a peaceful settlement through the International Court of Justice.

Rwanda

In FY 95, USAID provided \$4 million for administration of justice to reduce conflict by improving the Rwandan system of justice; promoting peaceful dispute resolution; establishing land tenure regulations; formalizing legal codes; holding a conference on genocide; and other activities. A waiver of Section 660 prohibitions was obtained to allow funding for training of investigators and prison directors, printing of manuals for

security forces, and for Ministry of Justice investigations and prosecution.

In FY 96, USAID will provide \$1.3 million in additional assistance for human rights monitors to mitigate conflict and human rights abuses in post-war Rwanda.

Ethiopia's Contribution to Rwanda

The Transitional Government of Ethiopia (TGE) deployed a battalion in support of the UN multinational peacekeeping force (UNAMIR) in Rwanda in 1994. The Department of State and the US Embassy in Addis Ababa actively supported this endeavor marking Ethiopia's first involvement in international peacekeeping since its participation in the UN force during the Korean War. When "Ethiobatt" (judged to be one of UNAMIR's most effective military units) was almost withdrawn in early 1995 due to difficulties over the structure of UNAMIR's mission and over reimbursement for costs, intensive efforts by State and the US mission to Ethiopia helped to secure the continuation of Ethiopian participation for another six months.

Sao Tome and Principe

Following the 22 August 1995 coup attempt, State launched a coordinated diplomatic and publicity effort condemning the takeover and calling for restoration of the duly elected president. Immediately upon being restored to power, the president credited the immediate action of the international community for reversing the coup. Specific responses included mediation by concerned donor governments (especially the United States, France, Gabon and Portugal). State also organized a USG delegation to the World Bank to discuss efforts to ameliorate conditions that destabilized the economy, helping to engender the coup attempt.

Zaire

In recent years, the United States has encouraged Zaire to behave responsibly towards its neighbors (including Angola, Rwanda, and Burundi) in order to avoid aggravating their crises. In particular, State made repeated demarches on the need to return weapons to the Government of Rwanda, cooperate in international inquiries on the smuggling of arms in the region, arrest intimidators in refugee camps, and abide by internationally-accepted standards for refugee treatment.

USAID Elections Support

US assistance for elections is provided as part of an effort to support the institutionalization of peaceful political change within countries. Strengthening electoral processes encourages more open and meaningful public participation. USAID and other US organizations help to ensure free and fair electoral contests and to enhance peaceful political competition.

There is a vital distinction between conflict resolution and conflict prevention. Elections provide a means for achieving the former in many "countries in transition" and the latter in "sustainable development countries." In South Africa, for example, the electoral process served as an effective conflict resolution device in a deeply polarized society. In a sustainable development country, a democratic election is a mechanism for conflict prevention through resolution of political power-sharing issues prior to escalation of tensions. In this sense, USAID assistance to the electoral commission in Ghana, for example, helped to prevent a potential conflict.

USAID has provided considerable support for electoral processes through the Africa Regional Electoral Assistance Fund (AREAF) and the International Foundation for Electoral Systems (IFES) in fiscal years 1995 and 1996, in collaboration with the National Democratic Institute (NDI), the African American Institute (AAI), and the International Republican Institute (IRI). USIA also continues to organize programs promoting free and fair elections in sub-Saharan Africa. These consisted of International Visitor, US Speaker, Professional-in-Residence, and Worldnet interactive programs that emphasize the necessity for fair, peaceful elections in emerging democracies. Several of the comprehensive programs financed by USAID are highlighted below. (A more detailed listing of AREAF activities is provided in Annex C.)

Ghana

USAID provided \$4 million to IFES in FY 95 to assist the Ghanaian Electoral Commission establish a voter registry and to strengthen the capability of the commission to administer and conduct elections. Voter rolls were badly out-of-date and this deficiency was a serious point of contention between the opposition and the government in the last election. As a result, the registry was targeted by parties and non-governmental organizations as the most important area for assistance. An updated national voter registry has now been completed and more than 90% of the voting public is registered. This has been an important step in gaining the confidence of the public and political parties for free, fair, and open elections. USAID will provide an additional \$1.15 million in FY 96 to further strengthen electoral processes in preparation for the December national elections.

Ivory Coast

IFES assessed requirements for election law and voter registration system reform in FY 95. Action is pending on a followup IFES proposal to computerize the voter registration system. Also in FY 95, an AREAF team met with government officials, political party leaders and activists, civic organization representatives and other observers to determine what specific elections support was required. With a \$600,000 USAID grant, AREAF implemented a comprehensive elections assistance program that included an international election observation delegation for the legislative elections and short-term legislative training, in collaboration with NDI and AAI. A post-electoral evaluation of the organization and conduct of the elections also was carried out. USAID sought to promote more confidence in future elections by seeking resolution to problems observed during the 1995 elections. Finally, with a \$250,000 USAID grant AREAF and NDI helped promote the involvement of women and other neglected constituencies in the electoral process.

Kenya

With a \$70,000 USAID grant, AREAF and IRI assisted the League of Kenya Women Voters in FY 95 to enhance the League's capability to effectively operate its headquarters and conduct successful outreach programs. The program: 1) encourages women of all races and classes to take an active role in politics; 2) sensitizes society on gender-related issues, especially cultural practices that hinder women's development; 3) enhances women's awareness of human rights; and 4) works for the repeal of legislation that discriminates against women of any ethnicity.

Sierra Leone

IFES assisted Sierra Leone in FY 95 in the examination of issues related to the planned transition from a military to a civilian, elected government. IFES also conducted a computer and management information system assessment for the interim election commission. In addition, with a \$375,000 USAID grant AREAF and AAI sponsored an election observation mission in 1995 for the presidential and legislative elections. Citizen participation in the electoral process also was supported through training of election monitors. Trained monitors were then deployed in cooperation with local NGOs. The presence of international monitors had a critical effect in promoting people's confidence in this electoral process. Thus, USAID assistance contributed to the military government's willingness to hold to the electoral calendar and proceed with a process that led to the transfer of power to an elected civilian government.

South Africa

Although the level of political violence in South Africa has decreased since the 1994 national election, in some areas political and community-level violence are disrupting development and democratic participation. The potential for conflict during the local elections in November, 1995 was high because many candidates had to campaign in areas afflicted by significant political polarization and violence. USAID continued to support a variety of conflict resolution and related programs, including assistance for the 1995 local government elections. Furthermore, USAID supported the Government's efforts to set up an independent Commission on Arbitration, Mediation, and Conciliation to facilitate resolution of labor and other disputes.

Tanzania

With FY 95 grant funding (\$500,000) from USAID, IFES fielded a pre-election assessment team and 25 international election observers, and helped to coordinate the USG (USAID, USIS and Embassy) local election observers for the first multi-party national and legislative elections in Tanzania, held in October, 1995. Voting took place both on the island of Zanzibar and on the mainland. The presence of the USAID-supported team allowed the USG to take the lead among observers in identifying problems with the Zanzibar election and to provide a detailed report to the National Electoral Commission suggesting ways to improve elections in the future.

C. Results

The success of efforts for conflict prevention or resolution is often most objectively measured at the regional or country-level by the actual status of conflict, i.e., was a potential conflict avoided or an ongoing conflict arrested or mitigated? By such broad measures one might judge the efforts of the United States and the international community successful in the case of South Africa, for example, but collectively a failure in the case of Liberia. However, the reality is that the success, or lack thereof, of the majority of attempts at conflict resolution are very difficult to measure. It is difficult to verify conflict avoidance and, furthermore, it is difficult to attribute both success and failure to donor interventions. What is clear is that in the absence of such efforts conflicts usually increase in their frequency and intensity and third parties eventually become involved, willingly or unwillingly. Finally, the costs of a humanitarian response to a Liberia or Rwanda crisis dwarf expenses of conflict prevention or mitigation.

Nevertheless, an evaluation of the general effectiveness of conflict prevention and resolution activities must attempt to measure results. **Preliminary indicators for results** are presented below as they correspond to the five major elements of the Act. These indicators will be measured over time.

Improving the Conflict Resolution Capabilities of the Organization of African Unity (OAU)

Results:

*USG contributes effectively to enhance the OAU's conflict prevention, early warning and conflict management capacities.

Indicators

--training, staffing, technical assistance, and equipment help institutionalize and maintain programs of the OAU Conflict Resolution Mechanism;

--the equipping, training and maintaining of a 100-person observer force enables the OAU to effectively monitor, react to, and resolve African conflicts;

--improved coordination between the OAU and sub-regional organizations on conflict-related issues.

Improving the Conflict Resolution Capability of Sub-Regional Organizations

Results:

*USG efforts help guide reductions in numbers of arms.

*USG assistance enhances the capacity of African sub-regional organizations to contribute effectively to conflict prevention, management, and resolution.

Indicators

--measures put in place for reductions in arms (e.g., completion of treaties and protocols);

--effectiveness of the conflict prevention, management and resolution efforts of multilateral sub-regional organizations in sub-Saharan Africa (e.g., ECOWAS, IGAD, COMESA, SADC, and CILSS).

Improving the Conflict Mediation Capability of Non-Governmental Organizations (NGOs)

Results:

*USG assistance augments NGO conflict mediation and reconciliation capacities and facilitates election processes; recognition is accorded to NGO contributions to resolving crises in the region.

Indicators

--creation and maintenance of an informal African conflict prevention network comprised of "eminent African and international statesmen" replicating efforts in Great Lakes region;

--collaborative relationships formed between such networks, NGOs, and representatives of regional organizations for conflict prevention and resolution;

--effective international NGO initiatives--e.g., by the Carter Center, Global Coalition for Africa, Free Africa Foundation, International Peace Academy and African-American Institute--that seek to contribute to mediation and reconciliation efforts in the region; and

--election processes effectively and transparently managed in x number of sub-Saharan African countries.

Supporting African Demobilization and Reintegration Efforts

Results:

*USG assistance facilitates reductions in size of sub-Saharan African armed forces and in military expenditures.

*USG assistance facilitates reintegration of ex-soldiers, their families, and other civilians into communities.

Indicators

--Military forces and military expenditures reduced in x number of sub-Saharan countries;

--demobilization-related activities effectively implemented, e.g., encampment, transportation of ex-soldiers to home communities, and retraining programs;
and

--displaced children reunited with families and orphans placed with families in home country or abroad..

Training Africans in Conflict Resolution and Peacekeeping

Result

*USG assistance provides international training and education opportunities to military and civilian personnel that strengthen African capacities to prevent, manage and resolve conflicts and to effectively manage peacekeeping operations.

Indicators

--conflict resolution and peacekeeping training is provided in the United States and in Africa for African military and civilian personnel, and

--conflict management programs are established at one or more African universities in collaboration with American university faculties.

D. Conclusion

The United States Government is contributing significantly to prevention and resolution of conflicts in sub-Saharan Africa. The descriptions contained in this report of the wide variety of USG-sponsored activities are testimony to the contributions of five US Government agencies and their international organization and NGO partners. At the same time, it is clear that the relatively small amount of US financial resources being devoted to these problems is diminishing, even as conditions that breed conflict are becoming more severe in some regions of sub-Saharan Africa. However, while it is tempting to "cut and run" because of the apparent hopelessness of a Liberia or Burundi, the record demonstrates that success through sustained engagement is possible even in the most difficult circumstances. South Africa stands out as the shining example of how a potential conflagration can be avoided, in part through the sustained engagement of the international community. There are other, less publicized successes. Ivory Coast, Senegal, Botswana, and Benin not only are thriving, but also have contributed peacekeepers and other assistance to neighbors in dire straits. Kenya, Guinea, Togo, the Congo, Guinea-Bissau, Zambia, Djibouti, Nigeria, Chad, Tanzania, Mali, and Malawi may still be struggling politically and/or economically, but they also have contributed peacekeepers and other assistance to help resolve conflicts elsewhere in Africa. Countries like Uganda, Mozambique, and Ethiopia were once paralyzed by war. Now, they are on the road to recovery. Hope exists for Angola and even Rwanda.

In sum, the human spirit remains indomitable even in the gloomiest of circumstances. As Africans continue to struggle to prevent, resolve and recover from conflict, the international community must remain committed to enhancing opportunities for Africans to succeed. Furthermore, the United States must lead if other members of the international community are to continue to work together cooperatively. It is in our own self-interest.

E Estimate based on partial or uncertain data. NA Not available. 0 Nil or negligible.

- a "Sub-Saharan Africa, Total" here includes South Africa: It is excluded in the cited source and in Table I above. Also, in order to reduce distortions caused by data gaps for individual countries and years (shown as "NA"), the total for "Sub-Saharan Africa" includes rough approximations for the gaps.
- b This series or entry probably omits a major share of total military expenditures, probably including most expenditures on arms procurement. Table II shows estimated annual arms imports; It should be kept in mind, however, that data in Table II represent the estimated value of arms delivered in a given year, not actual expenditures on those arms.

OFFICE OF THE ASSISTANT SECRETARY OF DEFENSE

WASHINGTON, D.C. 20301-2500

February 15 1996

In reply refer to:

I-96/38493

SPECIAL OPERATIONS/
LOW-INTENSITY CONFLICTMEMORANDUM FOR DEPUTY ASSISTANT SECRETARY OF DEFENSE FOR
AFRICAN AFFAIRS

FROM:

DEPUTY ASSISTANT SECRETARY OF DEFENSE FOR
HUMANITARIAN AND REFUGEE AFFAIRS

Prepared by Carolyn Holmes, 695-2136

SUBJECT: Humanitarian Support to Sub-Saharan Africa -- INFORMATION
MEMORANDUM

This memorandum is forwarded for your information relative to DoD's humanitarian support to Sub-Saharan Africa. A synopsis of activities executed in Sub-Saharan Africa during FY95 and planned for FY96 follow. Details are at Atch 1 and Atch 2.

x - Indicates executed in FY95

p - Indicates planned for FY96
